

# Emerging Spinecare Trends

## The Future Spinecare Facility will prioritize;

The Future Spinecare Facility will prioritize;

- collaborative interdisciplinary care (integrated multidisciplinary care)
- multimedia educational opportunities for patients/families
- biological solutions for the care of back pain and spine disorders
- the preservation and restoration of spine function
- the use of objective biomarkers and benchmarks in functional assessment
- diagnosis and care of peripheral complications associated with spine disorders
- early detection and intervention with screening services
